fresh food on the go

FFS BRANDS
Limited

Company

FFS Brands is the holding company, under the umbrella of which several well known brands such as Southern Fried Chicken, AJ's Piri Piri, Fast Food Systems Ltd and Vizu equipment are held.

Fast Food Systems Ltd are European leaders in the supply and manufacture of commercial catering equipment. We have over thirty years experience in the use and design of the equipment required to service this sophisticated, complex and ever-changing industry. We export our Vizu brand products to over 70 countries worldwide, providing the entire range in a variety of voltages. All items manufactured are to the highest European standards and carry the CE Mark, and with our dedicated research & development and new product design departments, we are constantly pushing back the boundaries of food service technology. We specialise in product consultancy and our CAD design department is used to produce the most ergonomical layout for even the most specialist of fast food kitchens. With our comprehensive range of services and products, including many market leaders, we have perfected the ideal turnkey systems for our customers.

Welcome

FFS Brands Ltd, manufacturer of the Vizu range of Quick Service Restaurant equipment, has seen its range of mobile carts go from strength to strength since their introduction.

The range of Vizu carts come in a choice of construction methods, either fully welded all stainless steel units or MDF carcasses with wood laminate finish. These mobiles are fully customisable to suit all your needs such as Coffees & Teas, Baguettes, Juices & Smoothies, Pies & Pastries, Hot Dogs, Popcorn and much much more. They do however lend themselves particularly well towards Coffee & Tea applications.

Borrowing from the technology used in Vizu's highly successful Fast Serve system, these carts can be kitted out with whatever is necessary, whether it be hot cupboards or fridges, lockable cupboards or drawers or ice chests, even a fully contained sink unit with reservoir and waste tank is available. All compartments have access to electrical power, and come complete with a trip switch for safety.

You can choose from the large selection available, or have one made completely bespoke to your needs. Either way, images and logos can be added to bring the cart in-line with your brand identity, and all finishes can be colour co-ordinated to match.

These carts are ideal for places where space is at a premium, or where full catering services may not be permitted, as their mobility means they can easily be installed and removed to allow easy re-location.

The strong construction also means they can be positioned outside meaning you no longer have to worry about getting customers to your product, you can take your product to your customers!

Depth: 700mm

Height: 2000mm

IT'S ALL ABOUT
TASTE!

Gull Wing Cart

This is an all stainless steel mobile cart for Fulham Football Club. The main body of the cart has space under for two mobile heated holding cabinets, and a sink unit. There is also a heated display on the main countertop.

This cart was supplied to the customer with full branding of the client's club logo's

When closed, the gullwing doors are lockable to provide the unit with security when not in use, and when open they act as an awning to provide shelter for the customer/staff from adverse weather. They also feature a built in gutter and drainage system for those wet weather days.

Specifications:

Width: 2000mm

Depth: 800mm

Height: 2105mm

This cart is supplied complete with a 32amp MCB Board for ease of electrical installation via a single commando socket.

Premier Pizza Cart

The food offer of a fresh pizza slice to customers at holiday parks is facilitated by this cart, which serves a great product, hot and consistently of a high quality.

This is a top of the range fully stainless steel, fully mobile cart. It has a large heated display on the countertop, with space under for a drinks fridge, some ambient storage and a heated holding cabinet.

The canopy is illuminated, and also has two illuminated boxes under for menu listings. It also houses a lockable pull down roller shutter to the front for added security when not in use.

Specifications:

Width: 2500mm

Depth: 820mm

Height: 2400mm

This cart is supplied complete with a 32amp MCB Board for ease of electrical installation via a single commando socket.

University Coffee Applications

2 Pod Coffee Cart

Roehampton University London

The client brief for this cart was to provide a mobile solution for coffees, cakes and snacks on campus with a unit that is flexible and totally mobile.

This curved, matt black wooden cart is comprised of two sections. The main section with the coffee machine has lockable ambient storage and a fridge under. The canopy houses four spotlight downlighters and menu listings to the front.

The curved side pod, for the display and sale of snacks and cakes has lockable ambient storage under, and also a lockable sink unit with water and waste.

Specifications:

Width: 3395mm

Depth: 860mm

Height: 2080mm

This cart is supplied complete with a 32amp MCB Board for ease of electrical installation via a single commando socket.

Pod Coffee Cart

The brief for this cart was to design a cart unit to serve coffee to students on campus but also to be completely mobile to move it around the college as necessary

This fully branded curved cart for Middlesbrough College features a self-service coffee machine, with a till area and displays for snacks. The canopy has four spotlight downlighters, and the main cart has fully lockable ambient storage cupboards under.

Specifications:

Width: 2100mm

Depth: 860mm

Height: 2100mm

This cart is supplied complete with a 32amp MCB Board for ease of electrical installation via a single commando socket.

2 Pod Coffee Cart

This fully mobile fully branded cart for the University of Teesside comprises of two sections. The main section, used for snacks and a till area, has a canopy featuring four spotlight downlighters, lockable ambient storage under and houses a fridge.

The smaller side pod has ambient storage under and is used to display some more snacks and a self service coffee machine.

This cart is sited with some refrigerated reach in displays, enabling it to offer a more comprehensive range of food and drinks with limited staff.

Specifications:

Width: 3200mm

Depth: 860mm

Height: 2100mm

This cart is supplied complete with a 32amp MCB Board for ease of electrical installation via a single commando socket.

3 Pod Coffee Cart

University of Sunderland

This premium coffee cart system is made up of three descending height pods; an ambient cake and snack display with a till area, a coffee machine and grinder area, and a serving and collection area.

The centre section has two under counter refrigerators for storage of the chilled items such as cream, milk, etc.

There are various laminate finishes available in both wood and solid colour finishes.

FAIRTRADE

These pods are finished with an Italian wood laminate and stainless steel skirting, and has fully lockable ambient cupboards under, with a knock-out drawer and cup dispensers.

Specifications:

Width: 4355mm

Depth: 1085mm

Height: 1000mm (tallest pod)

This cart is supplied complete with a 32amp MCB Board for ease of electrical installation via a single commando socket.
