

PASS THROUGH RANGE

VIZU 1100 PASS THROUGH ECONOMY

- Designed to fit on a central service counter.
- To be loaded from the rear and served from the front. Offers visual display whilst holding cooked foods at the correct temperature and high relative humidity.
- Essential to retain the moisture in products such as chicken, meat and bread/pastry products etc.
- The internal multi stacked racks allow for maximum product storage location.
- Increases the ease of working with FIFO (First In First Out) and allowing proper air flow around the product.
- Individual doors for each pan
- 12 x 1/1 gastronorm sized racks
- Variable digital thermostat control with illuminated interior.
- Left or right water feed option with automatic filling of water tray.
- No fan to fail – unit uses convection to circulate humidity.
