

TOASTER RANGE

VIZU SLIM LINE BUN TOASTER

- Allows a production line type of toasting.
- The operator will place a 'Heal & Crown' into the relevant top slot, the unit will then feed the bread down through the unit, as the bread drop into the machine the next 'Heal & Crown' can be placed in above the previous.
- Once the sugar coated bread has passed through the machine, the surface of the bread will be 'caramelised' reducing the impact of moist products placed next to it in a sandwich, improving the quality of the sandwich.
- Vertical style allows reduced footprint
- Lower bread chute can be placed front or rear
- Works with a two staff member system – load from rear removed from front
- Adjust the depth to allow for thinner or thicker 'Heals & Crowns'
- Easy maintenance design to minimal down times
